

Premium UV Nail Gels
for a Professional Finish

At FemtoTechs Inc., we pride ourselves on providing the highest-quality UV nail gels, designed for both professional and at-home use. Our extensive range includes Foundation (Base-coats), Color-coats, Gloss and Matte Top-coats, Rubber-base, Builder Gel, and Polygel – all developed with cutting-edge technology for flawless results.

Key Features:

- Skin and Nail Friendly
- Free from HEMA, DiHEMA, and Heavy Metals
- Acid-Free for a Gentler Application
- DuraGloss Technology for Lasting Shine

Base-Coat (Foundation Gel):

Our Base-Coat is formulated to be acid-free, ensuring a gentler application. It prevents nail staining and provides excellent adhesion to a wide variety of natural nail plates. The optimized adhesion formula ensures a long-lasting foundation for perfect nail extensions or color coats.

Color-Coats:

Choose from over 1000 vibrant colors, offering a high-pigment formula for intense, lasting color. Our color-coats cure perfectly at the surface, ensuring a smooth, flawless finish. They are formulated to not stain or contaminate the topcoat, allowing you to achieve a consistent and beautiful result every time.

Top-Coats (Gloss and Matte):

Our DuraGloss technology allows our Gloss Top-coat to retain its shine for at least 4 weeks, while the Matte Top-coat offers a sleek, modern finish.

Rubber-Base:

Our Rubber-Base gel provides flexibility and strength, making it ideal for those seeking a durable yet flexible finish. During mechanical removal, the stresses on the nails are minimized, helping to keep the nails more intact and protected.

Builder Gel:

Perfect for sculpting nails, Builder Gel provides a thicker consistency for creating extended nail lengths and strong arches.

Polygel:

Our Polygels are UV-curable and do not require any powder. They offer a lightweight, strong, and versatile formula that is easy to form and file, allowing for precise nail extensions and custom shapes.

Why Elysia?

At FemtoTechs Inc., we use only the finest ingredients in our UV nail gels. We ensure that all products are free from harmful chemicals, providing a safe and enjoyable experience for both professionals and customers. Our DuraGloss technology ensures that the gloss of your nails will last for weeks without chipping or fading. Whether you're looking for a glossy or matte finish, our topcoats maintain their appearance for a longer time, giving you flawless nails. Discover the full range and elevate your nail game with our professional UV nail gels today.
