ABOUT US

By choosing the best quality in the materials used, while responding to the tastes of the audience in designing and adhering to green methods in production, Manzoori Group intends to fulfill your dream of special and luxurious decoration while respecting nature and the environment.

since 1397, this group has succeeded in producing unique products in various parts of building materials and interior decoration, such as outdoor furniture, bathroom furniture, various types of flooring and wall coverings made of wood, leather, etc. using a different design and the use of luxury materials.

By choosing the best quality in the materials used, while responding to the tastes of the audience in designing and adhering to green methods in production, Manzoori Group intends to fulfill your dream of special and luxurious decoration while respecting nature and the environment.

since 1397, this group has succeeded in producing unique products in various parts of building materials and interior decoration, such as outdoor furniture, bathroom furniture, various types of flooring and wall coverings made of wood, leather, etc. using a different design and the use of luxury materials.

For the first time in Iran, the use of processed and water-repellent leather and different luxurious African woods highly resistant against possible impacts and different weather conditions, have given a distinctive effect to the products of this group and has established The Manzoori brand as one of the luxurious and nature-friendly brands in the construction industry.

Respecting the opinion of customers and believing in freedom of choosing the desired dimensions and color of furniture, made us to provide you with the opportunity to customize the products in order to meet your desires better than ever.

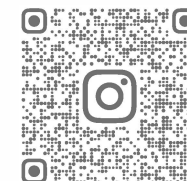

Realizing the touch of a dreamy feeling with Manzoori productions is our greatest goal.

AMIRHOSSEIN MANZOORI
Founder of Manzoori Group

With years of experience in the construction industry and a background in architecture, I founded Manzoori Group as a response to the shortage of innovative materials and products. For over ten years, I have been specializing in the design and furnishing of outdoor spaces, ranging from outdoor furniture to creative solutions for flooring, wall coverings, and other environmental elements.

Supported by a team of young, creative, and skilled professionals, and utilizing the finest materials and cutting-edge technology from around the world, our goal is to deliver products that meet modern design trends and the evolving needs of our clients. For me, each project is an opportunity for innovation and raising the standards of the industry.

OUT DOOR FURNITURE

Relying on the expertise of interior designers and identifying the needs and tastes of the audience, and also depending on numerous years of experience in the wood and wood products industry, we intend to produce a special and different design of outdoor furniture.

One of the important features of Manzoori Group Furniture is the use of African hardwoods in the construction of furniture frames and bodies. The use of natural and beautiful African wood in the manufacture of Manzoori furniture has created a special effect inspired by nature, while making the feeling of warmth and pleasantness of using natural elements more tangible.

Simplicity and beauty, together with observing ergonomics in Manzoori outdoor furnitures, bring a different sense of relaxation. Creating the possibility of optimal use of space, the minimal and modular style of these products, will double the comfort and convenience for a continuous and long-term presence in open and garden-like spaces.

SUN BED

From the Maldives sun beds, only a wide dark plinth can be seen, which instills a sense of strength and, at the same time, invites you to a pleasant rest in the sun.

COFFEE TABLE

Maldives coffee table has been made of combination of a thin plate on a pedestal. The legs of the table are at a suitable height of the furniture and the wide width of the table top has created ideal comfort and maneuverability for entertainment and arrangement.

MALDIVE

While being relaxing and comfortable, the Maldives design, brings about a different feeling for the use of luxury items in nature. Minimalist design, low height, large seating width and high back-support surface for more comfort are the features of Maldives set. The frame and body of this furniture made of light Iroquois wood with bold gray streaks that have a special glow in the sun, in combination with the navy blue color of the mattresses have created an eye-catching harmony of texture and color of wood and fabric.

CAICOS

The purpose of the modular design of the Caicos model is to provide more comfort and variety in layout. The right combination of dimensions and volumes makes this set easy to carry, move and install. Also, the combination of these dimensions has made it possible to make furniture with larger dimensions, which will bring you rest, comfort and convenience for hours.

SUN BED

The Caicos pool or sun beds are simply designed linearly with a combination of horizontal lines and small parallel lines continuously. The possibility of adjusting the bed support at the desired angle, as well as the appropriate width and ideal thickness of the mattress, provides a pleasant comfort.

SOFA

Iroquois pieces of wood with their unique color, which are repeated parallel to each other, create a beautiful play of lines and shadows and contrast of colors. The simple and minimal design of this set takes the mind away from any conflict in the design, and in addition to observing ergonomic principles in the design of the structure, provides you with hours of rest with ultimate peace and comfort.

DINING TABLE

this table utilizes the strength and simplicity of a pure linear form here employing rows of parallel slats in premium teak to offer a bold play of contrast and shadow.

SUNBED

Enduring construction and superior materials, including quick-dry reticulated foam cushions, offer comfort and weather the elements beautifully.

SOFA

Enduring construction and superior materials, including quick-dry reticulated foam cushions, offer comfort and weather the elements beautifully. Our Classic size is perfectly proportioned for smaller spaces.

DINING TABLE

Paloma dining set chairs consist of repeating angled geometric shapes with regular angles next to each other. Rectangles with a large width and suitable height that create a very ideal sitting area at the right angles for a long meal and chat. The base of the dining table is intertwined with the repetition of geometric shapes. The combination of two large rectangles that have a plate consisting of repeating parallel cuts of Iroquois wood and placed at a suitable height to fit the chairs.

PALOMA

A unique combination of geometric shapes in the design of this furniture has given it a unique beauty while being so simple. The angular form with deep lines combined with the classic design has created a special style and art in this set. In fact, Paloma set is an application of luxury outdoor decoration

SOFA

The modular mode and minimal design of the furniture set next to a sufficient table provide the possibility of optimal use of space and evoke a special order of accompaniment of geometric volumes in the mind.

DINING TABLE

Mustique dining set depicts simplicity while being beautiful and original. The appropriate height of the backrest and the wide seating width of the chairs make it an ideal position to sit and enjoy eating.

MUSTIQUE

This model is a combination of classic and modern elements that have created a unique convergence. Narrow frames with deep intersecting lines and multiple angles combine geometric volumes as beautifully as possible to create a new form. The combination of classic and modern style evokes a sense of uniqueness while simplicity and tranquility, making this set a luxury choice for outdoor spaces..

NAVARO

The Navarro sofa features a minimalist design with clean, cohesive wooden frames that showcase natural beauty and modern elegance. Its sleek lines and sturdy structure convey a sense of both strength and refinement. The use of natural wood and soft curves brings a calming and harmonious style, making it a perfect fit for both modern and classic spaces.

SUN BED

Navaro pool beds are also an artistic repetition of the same frames, which this time are more elongated and with less width next to each other and have made the main body of the bed. The ability to adjust the insole of the bed and the possibility of increasing its height as a support has provided the possibility of increasing the comfort of these beds according to your needs.

DINING TABLE

The Navaro Dining Table is a beautiful evolution in the design of this set, which, by placing the table and chairs next to each other, seems to create a remarkable work of art.

SOFA

The Navaro model is a combination of geometric shapes with regular angles that together create a shape that is extremely symmetrical and beautiful. In the evolution of the design, the appropriate height of the backseat and the seat, as well as the height of the sofa handles in proportion to the backseat, has created an ideal position for sitting.

SUN BED

In the Maya design pool beds, only a wide plinth of wood can be seen, which is below the space of the mattresses. The back of the furniture also includes wide plinths from the back, which are repeated alternately next to each other, creating a beautiful play of line and shadow.

SOFA

The right angle of the backrest and seat of this design creates ergonomics with the utmost elegance and precision and brings unparalleled comfort due to the relatively large width of the backrest and seat.

MAYA

In Maya design, only by combining line and color, a sense of calmness and stillness together with weightlessness is instilled in the mind. Minimal and modern form that is dominated by neutral colors and this has made this set a beautiful object to be placed in a variety of spaces. The furniture frame is placed under the pillows in a thin plinth and the setback is not visible. However, the proper seatback and depth of the seat provide a good space for sitting. In Maya design, the structure, design and the applied colors are harmonious in a way that they only evoke peace and comfort.

OLEMA

In the design of Olema furniture, the shape and line are specially intertwined creating different and at the same time symmetrical shapes. Various angles, new closed and semi-closed shapes have created a new form of modern design and style.

SOFA

Playing with angles and breaking lines have created a suitable seat with great depth and an excellent angle for placing the legs. Combining creative design with adherence to ergonomics in making this set brings amazing peace and comfort.

COFFEE TABLE

(the above picture) The table in front of the furniture, in line with the geometric shape of the chairs, consists of a rectangular cube, which harmonic with the shapes of the furniture shows a beautiful accompaniment of geometric items next to each other.

SOFA

The low height of the backrest in harmony with the large width of the seat and the wide handles with a suitable angle for the armrests, as well as the short bases that show themselves in the form of wide plinths, invite you to unique peace and relaxation in nature for hours.

SUN BED

A simple object consisting of clean and regular angles with handles that can be seen from the front view in the form of narrow lines, box-like volumes that will plunge you into a deep sleep in nature.

DINING TABLE

With a streamlined silhouette and clean right angles, expertly crafted with metered corners and dovetail joinery, Marbella is pure Modernism. Broad slats are juxtaposed with narrow elements and framed open space, creating a perfect formal balance.

MARBELLA

With the modernization of American comfort furniture, Marbella furniture is designed for more comfort. The wide frame of the handles and bases from the front view and the uniform and beautiful shape it has created, put this set together like beautiful cubes. The combination of rectangular shapes gives this set a sturdy and solid appearance, which at the same time evokes the right balance for more comfort while sitting.

MILANO

The high style and sophistication of milano make it a perfect choice of outdoor seating to enhance a distinctive lifestyle.

SUN BED

These sunbeds, with their natural wood frames and modern design, perfectly align with a minimalist aesthetic. The clean lines and adjustable backrests ensure both style and comfort, making them ideal for any contemporary outdoor space. Perfect for pool side lounging, these sunbeds add a touch of elegance and relaxation to your decor.

OTTOMAN

This ottoman complements the sofa with its natural wood and modern design, enhancing the overall minimalist aesthetic. The clean, angular lines and light wood color create a cohesive look, offering both functionality and style. Ideal for modern living spaces, this ottoman adds a versatile and attractive touch to your decor.

SOFA

This sofa combines natural wood with a modern design, bringing simplicity and elegance to any space. The clean, angular lines and light wood color create a minimalist aesthetic. Ideal for modern and minimalist living areas seeking a stylish yet understated decor.

PALOMA NEW

The wide angled frames along with the solid shape of the bases and pillows have created a neoclassical design in this set. The clean angles and line breaks in the frames, which radiate light to the surface of the Iroquois wood, make the furniture a work of art. The angle of seat and back support in combination with the frames that are made as sofa handles is in a way that they have created the possibility of a full rest with ultimate comfort.

SOFA, SUN BED, DINING TABLE

This set is a beautiful recreation of the accompaniment of regular frames together, which has created a dramatic as well as simple visual rhythm..

COFFEE TABLE

The table's crisp geometric form is softened by the sleek curvature of the legs for sculptural presence.

DINING TABLE

Masterfully crafted of sustainable harvested premium solid teak, Prado's curved frame wraps around generously proportioned seat cushions for supreme comfort and performance.

SUN BED

The Prado sunbed features a modern, minimalist design that blends elegance with comfort. Its wooden frame, with smooth lines and gentle curves, creates a sense of continuity and natural flow. This design, focused on simplicity, is ideal for outdoor spaces by the beach or pool, offering a serene and harmonious connection with the natural surroundings.

PRADO

Rendered in premium teak, the frame's striking T-back transitions seamlessly into gently curved arms, the geometric silhouette a study in proportion. The open platform frame conveys lightness, while ultra-thick seat cushions lend solidity and impart exceptional comfort.

SLAB WOOD

Hardwood slabs are highly popular for use in tabletops and countertops due to their natural beauty and durability. These slabs are crafted from large, single pieces of wood, showcasing unique grain patterns that give each piece a distinctive look. Hardwood slabs are known for their strength and resistance to wear and impact, making them ideal for high-use areas.

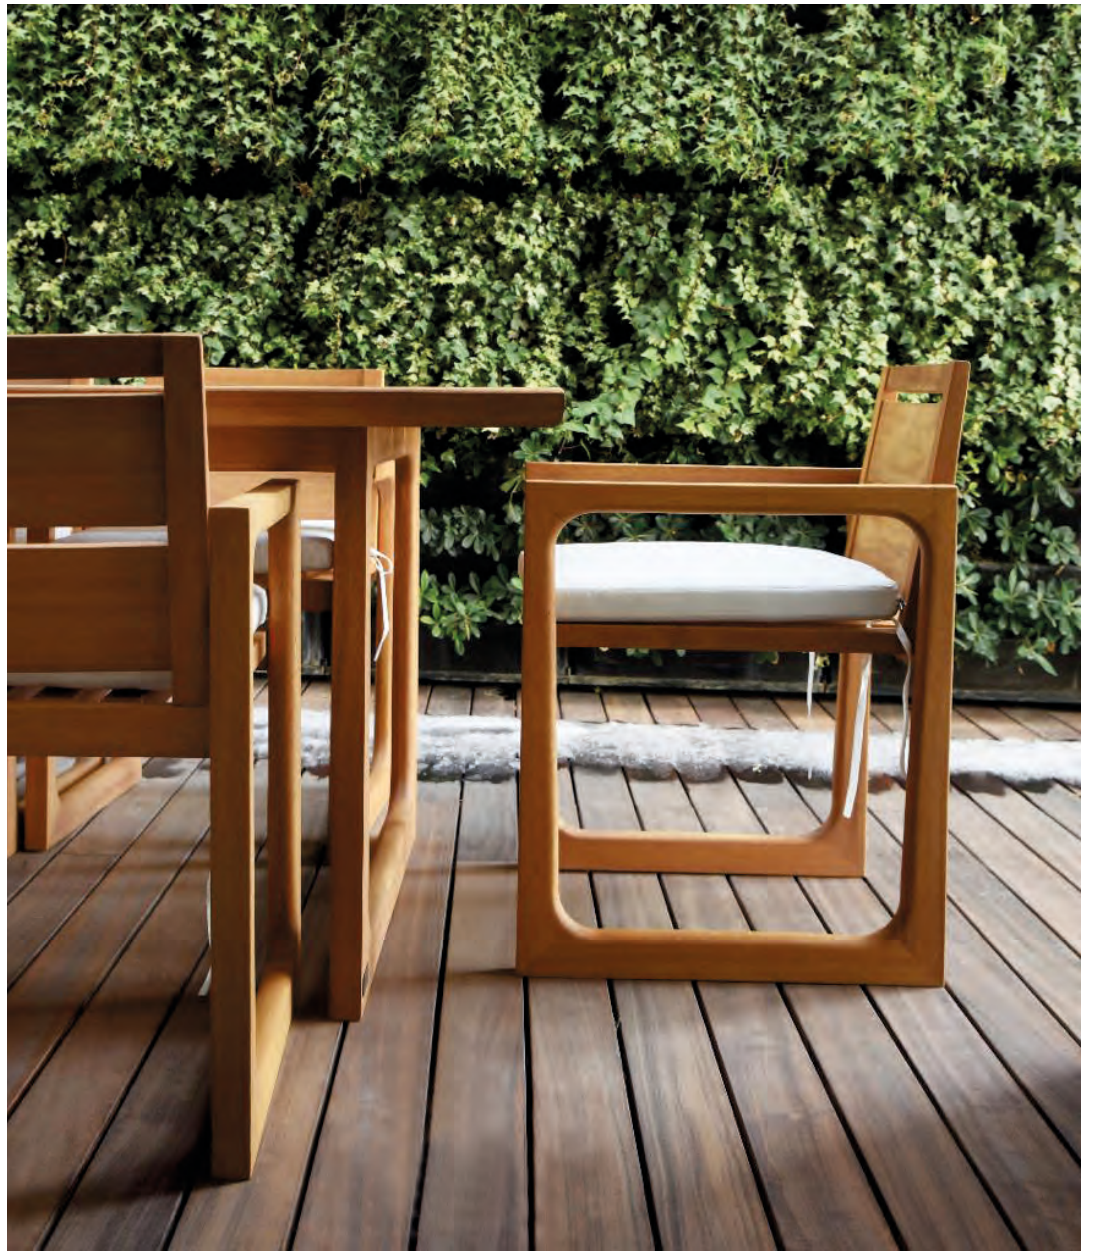

ELEGANCE AND COMFORT IN
EVERY OUTDOOR SPACE

SPA & SAUNA

For designing and building a sauna and spa with the best wood, it's essential to choose durable, moisture- and heat-resistant materials. The wood should maintain a balanced temperature, offer a natural and calming appearance, and resist mold and mildew. Key factors include ergonomic design, proper ventilation, and easy maintenance, all of which contribute to the longevity and aesthetic appeal of the space. With this approach, you can create a luxurious and durable sauna and spa that provides a comfortable and relaxing experience.

Ayous wood, derived from tropical trees in Africa, is lightweight, has a smooth texture, and offers moderate resistance to moisture and temperature changes, making it a suitable option for sauna and spa environments. This wood is more resistant to high heat compared to some other types of wood and does not warp easily. Additionally, Ayous wood doesn't absorb heat quickly, which prevents its surface from becoming too hot in saunas. This makes it ideal for seating areas and interior walls in saunas.

Ayous wood, also known as Obeche, is a lightweight, moisture-resistant, and heat-resistant wood sourced from tropical regions of Africa. Due to its excellent thermal insulation properties and natural, attractive appearance, it is ideal for constructing spa spaces like saunas. Ayous is easy to work with and adds a warm, calming atmosphere to interiors, making it a popular choice for spa design and construction.

DECKING & CLADDING & PERGOLA

Nowadays, adherence to the principles of green architecture and the use of new and sustainable building materials to increase the life of the building and reduce CO2 emissions during the construction process, has become one of the major concerns of manufacturers and designers.

With a glance at the needs of contemporary man and with the support of the art and expertise of Iranian designers, while using the latest European technology in cooperation with domestic and international collections, Manzoori Group has succeeded in creating a new attitude in producing new and sustainable building materials in Iran. The production of natural renewable materials with long life and different quality will have less adverse effects on the environment and will improve the performance of the building life cycle. One of the most important products of Manzoori group is all kinds of floor and wall coverings made of African wood.

NEO VILLA

Dehkadeh Fardis

Iroko wood, native to West Africa, is highly regarded for its distinctive features, including natural resistance to water, moisture, insects,

and fungi, making it a popular choice for flooring and villa facades. This durable and resilient wood, which ranges in color from golden brown to dark brown, gradually develops a beautiful silvery-gray patina over time. In addition, Iroko can withstand temperature fluctuations and various weather conditions, making it suitable for both indoor and outdoor applications, maintaining its durability and aesthetic appeal without requiring extensive maintenance.

FARVARDIN

Mazandaran - Iran

Today, the use of wood in floor coverings and workplaces is very popular.

variety of colors and textures of wood as well as its different and natural structure has made it one of the main options of floor coverings for most people in a variety of office and residential places. For covering this need in today's market, Manzoori Group has produced various types of wood parquets from various types of African hardwoods.

ROMA RESIDENTIAL

Kamraniyeh - Tehran

One of the applications of wood in the building is wooden flooring. Wood flooring is very popular because of its spectacular views and natural effects, and many people choose these floors for their living space (indoor and outdoor). High resistance to moisture and insect infiltration, especially termites, ease of installation, high durability, economic efficiency and distinctive appearance are among the most important reasons for choosing this type of flooring. In the meantime, exotic African woods with different durability and appearance are among the most practical woods for making different types of tiles. Manzoori Group has selected the most beautiful and durable samples of African wood to produce a variety of wood tiles as wall coverings and flooring.

MANA

Niavaran

Iroko wood is an excellent choice for terrace flooring due to its high resistance to moisture, weather conditions, and insects. Over time, it darkens and develops a beautiful natural appearance. Its natural oils give it long-lasting durability with minimal maintenance required. However, it can be more expensive compared to other types of wood.

LATIFI

Fereshteh - Tehran

Wood as a full-fledged symbol of nature is one of the most popular and practical elements and materials in the construction.

AFRA TOWER

Elahiyeh - Tehran

Iroko wood is an excellent choice for decking due to its high durability and natural resistance to weather and insects.

Quick Deck Iroko, made from Iroko wood (African teak), is an excellent choice for outdoor decking due to its high resistance to moisture, insects, and weather changes. This decking features a modern design and quick installation system, adding the natural and lasting beauty of wood to your space.

NAROON VILLA
Mazandaran

Padauk wood decking is known for its rich color and exceptional durability. Its natural resistance to moisture and insects makes it a perfect choice for outdoor spaces, offering both beauty and longevity.

NAROON VILLA
Mazandaran

Padauk wood is an excellent choice for decking. With its warm and attractive colors ranging from red to brown, this hardwood not only adds beauty but also offers high durability and resistance to moisture and insects. Due to its natural hardness and stability, Padauk is an ideal option for outdoor spaces such as terraces and open areas.

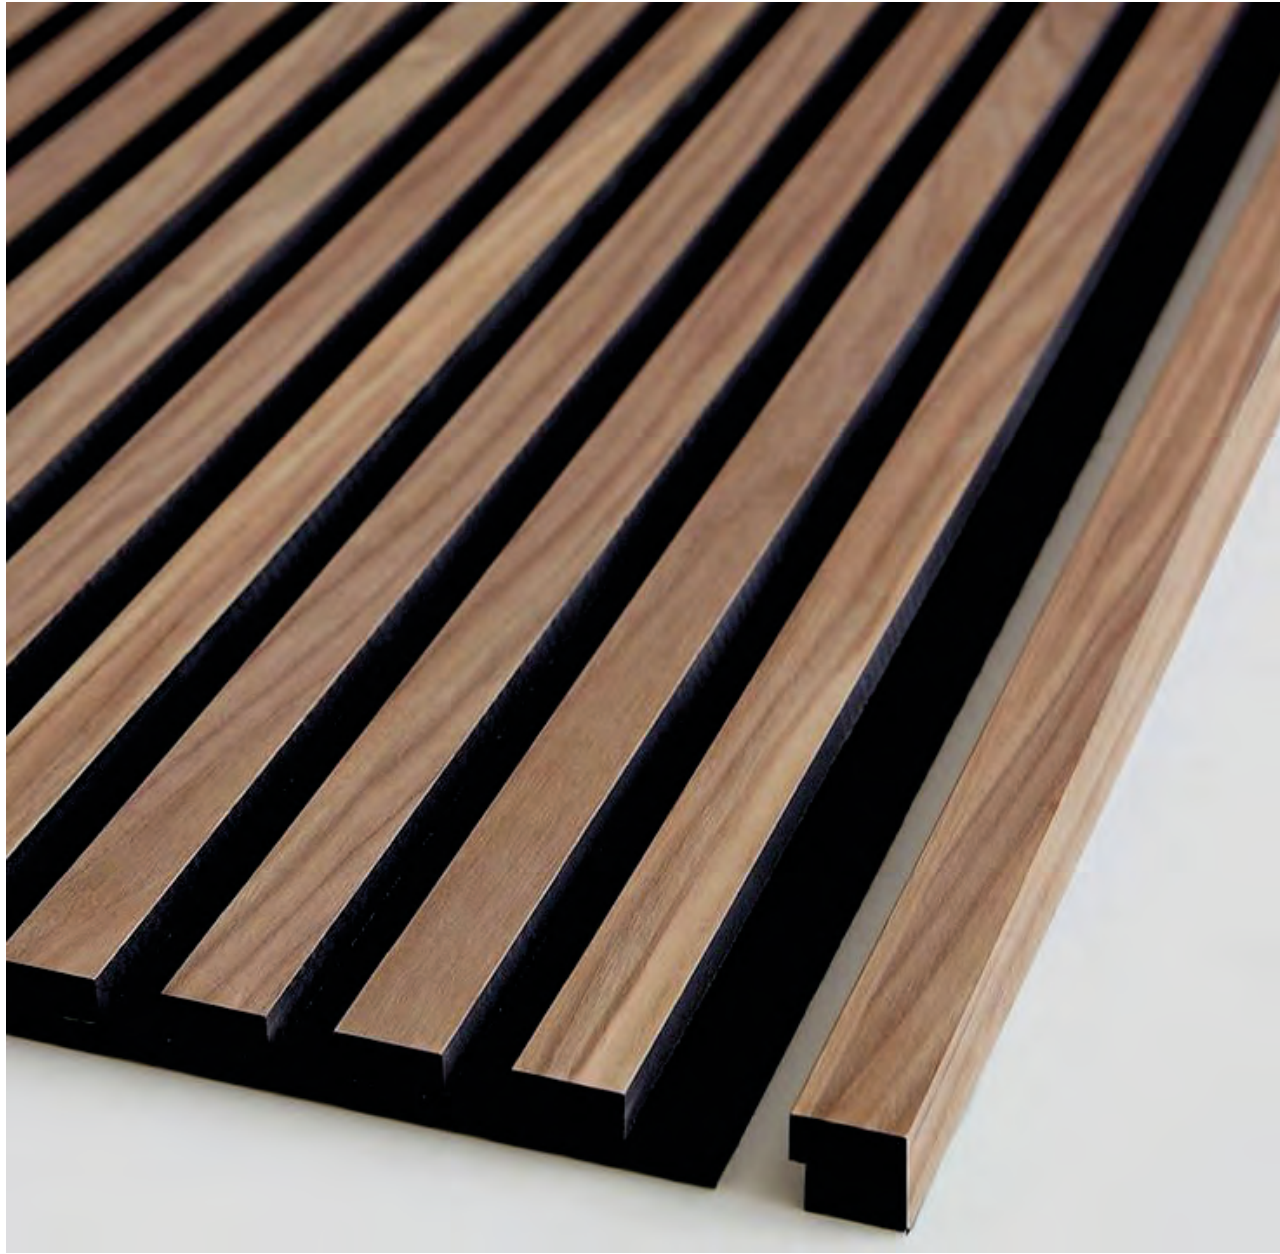

PERGOLA

Wooden gazebos made from Iroko wood, also known as African teak, are an ideal choice for outdoor structures due to their high durability, resistance to moisture and insects, and natural beauty. This wood, with its warm color and no need for painting, provides a lasting appeal to the gazebo. By choosing these gazebos, you not only get a sturdy and beautiful structure but also respect the environment.

FLOWER BOX

Wooden flower boxes are a popular choice for both indoor and outdoor decor. Made from various durable woods, they add natural beauty, warmth, and charm to any space. These flower boxes easily blend with different styles of decor and can be used as decorative elements in gardens, balconies, patios, and even indoors. Their high durability and resistance to various weather conditions make them an ideal environment for growing plants. Additionally, they can be easily moved and placed in different locations as needed.

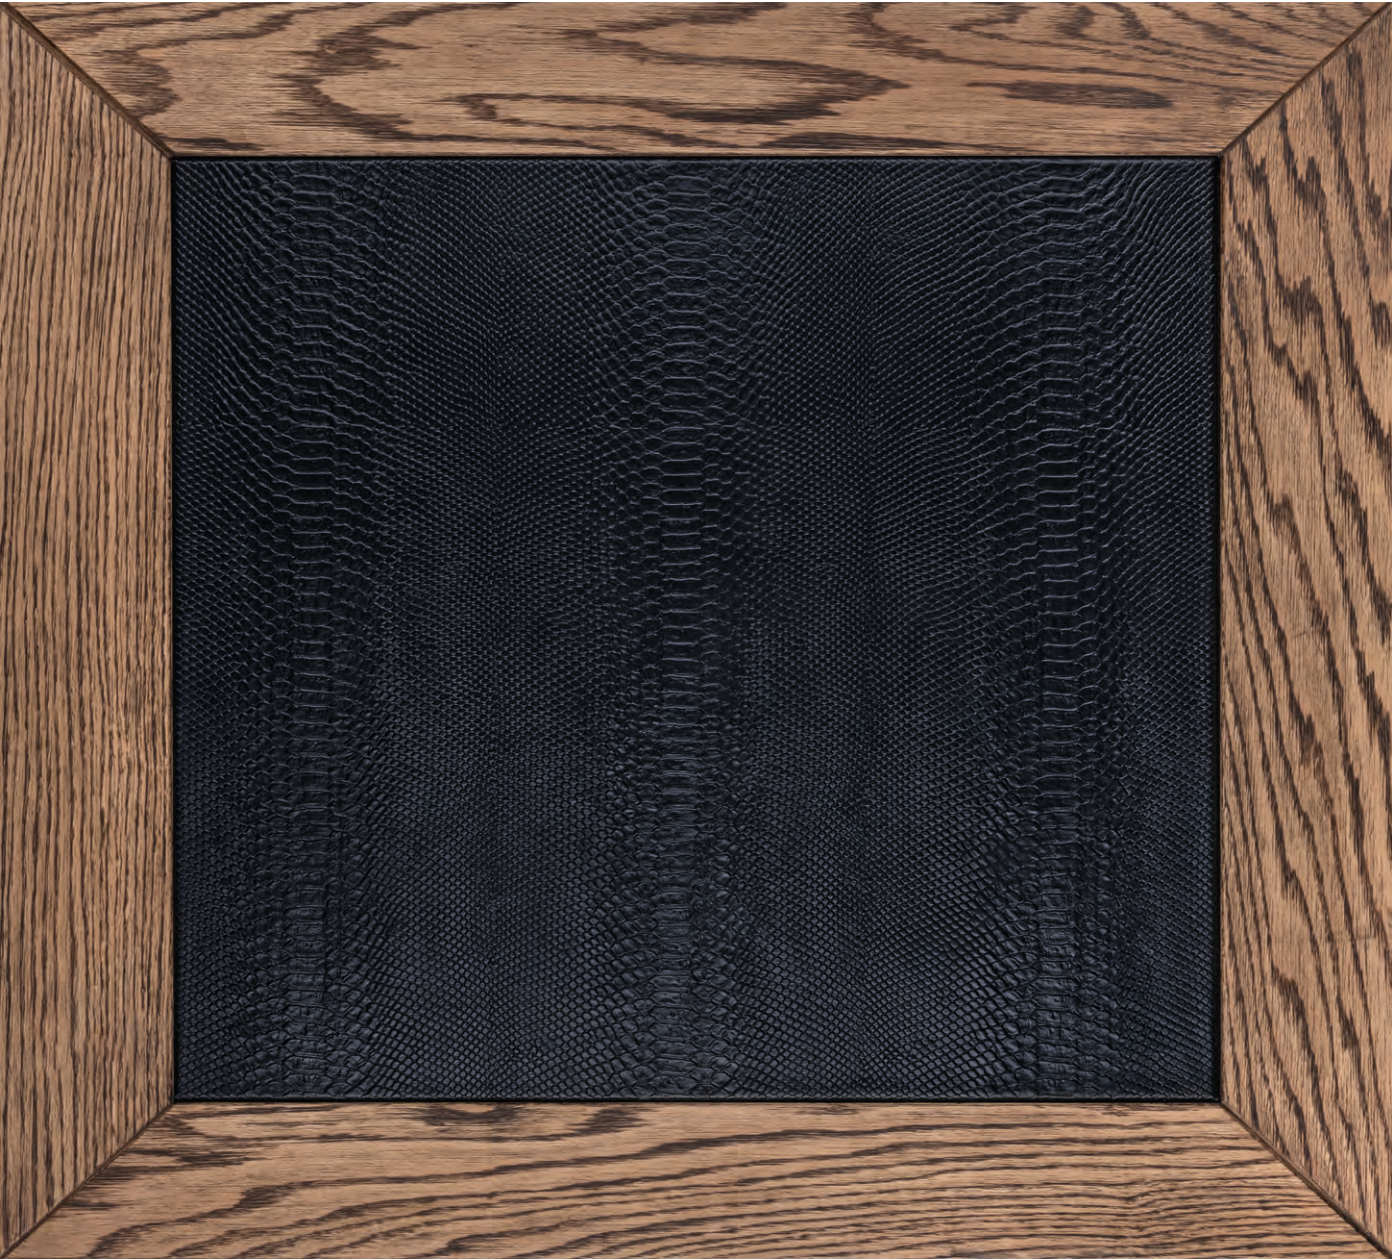

INDOOR AND OUTDOOR FLOWER BOX

Wooden indoor flower boxes add warmth and natural beauty to interiors. They enhance home decor and are perfect for displaying plants in living rooms, kitchens, and other indoor spaces.

PARQUET

Manzoori group parquets are produced in two groups: Engineered and solid, in a wide range of designs and colors due to the remarkable variety of African woods. These parquets are made of oak, walnut, sapli, kaya, limba and iroko. Durable nature, no need for constant care with preservative oils, resistance to abrasion and corrosion are important features of African woods used by Manzoori Group. The distinctive color and texture of these woods have made the parquets produced by Manzoori Group having a distinctive effect compared to other similar products. For example, Iroko wood flooring with a halo of gold-colored strips or dark parquet wood is one of the most popular species in the world, which is used for a variety of home and commercial purposes.

LEATHER PARQUET

WOOD & LEATHE

One of the most luxurious natural materials with a unique appearance and completely environment-friendly, Leather parquet with a combination of wood, bronze and steel frames are used as floor coverings. These parquet are good insulators for sound and heat and create a different feeling of the warmth of natural elements in the environment. In the production of parquet, 100% of natural leathers are processed by plants, which, especially as flooring, have a high resistance to tearing, abrasion and other destructive environmental factors. Leather parquet will give a distinctive look to your home or office space. You will be able to create a luxurious and at the same time warm atmosphere by using the leather flooring of Manzoori group. Fire resistance, flexibility in different temperature conditions and sound absorption are the most important features of leather construction material.

The acoustic properties of leather make it a great choice for floor coverings in bedrooms, management rooms, libraries, theaters and display rooms. Leather parquet are easy to clean and if cleaned with wax, they will have a high resistance to moisture and dust. High speed in installation, ease of maintenance, ease of replacing damaged parts. no change in size over time, are other features of leather parquet that make them stand out compared to other materials.

WOODEN PARQUET

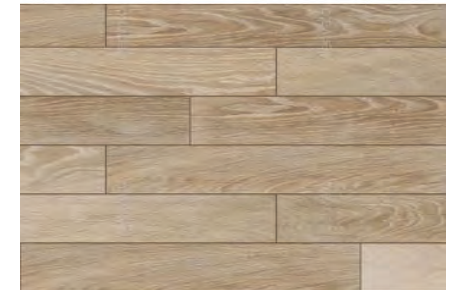

SAPELE

This species has a very high resistance against insect attacks and is a beautiful wood from the heart of Africa. Beautiful wood texture with dark distinct color and grains that can be seen in it has made Sapli a suitable choice for making different types of decorations. This wood has dimensional stability and its parquet can be used for many years. The special golden yellow or light brown color of Iroquois, which darkens over time when exposed to sunlight, offers a different floor covering from this wood. In terms of appearance and performance, Iroko is similar to teak and due to its lower price than teak, it is a good alternative. It is a very hard wood for maintenance and protection of which, it is enough to use sunflower oil to express its special golden-brown color and to be protected against ultraviolet rays.

LIMBA

Limba wood is another unique and popular African wood for parquet production, which has a more reasonable price than other African woods. The color of limba is unlike any other hardwood and has a unique range from light colors (corina) to dark colors. Dimensional stability and very high mechanical strength are among the features that make parquet made of this wood a suitable option in flooring high-traffic and high-population spaces. The passage of time does not change the appearance of Limba parquet as it turns to a beautiful gray color over time.

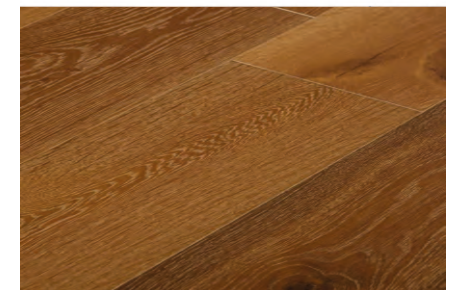

PADAUK

Paduk luxurious and hard wood is one of the very different African woods that is used in the production of multiple types of parquet because of its unique characteristics. Due to the special capabilities of this wood, including dimensional stability, natural resistance to insect attack, the reddish brown color, which sometimes has dark brown or orange streaks, and finally the unique texture that always keeps the look of this wood alive and shiny, Manzoori group has produced various types of parquet from this wood.

DIBETOU

Parquets made of African walnut or dibetou produce an eye-catching and beautiful surface. A unique range of dark brown and chocolate brown colors has made this parquet one of the most popular parquets in the world. The hardness of walnut parquet is such that it is used as an indicator to measure the hardness of other parquets. A distinctive feature of walnut parquets is that they are highly compatible with the relative humidity of the space in which they are installed and are therefore much more resistant.

IROKO

Iroko parquet, with its warm golden to dark brown tones and natural grain, is a popular choice for indoor flooring. Known for its high resistance to wear, moisture, and temperature changes, this wood is highly durable and requires minimal maintenance. In addition to its durability, Iroko parquet adds warmth and elegance to any space, making it suitable for both residential and commercial environments.

WOOD AND LEATHER PARQUET

The combination of wood flooring and leather in interior design creates a warm, elegant, and appealing atmosphere. Wood flooring adds a natural and calming feel to the space with its variety of colors and patterns, while leather, with its luxurious and smooth appearance, brings a modern and sophisticated element.

Using these two materials together creates an attractive contrast between the natural, classic texture of wood and the contemporary beauty of leather. This blend is especially effective in living and office spaces, providing an ideal balance of comfort and style, enhancing the inviting and aesthetic quality of the environment.

WASH BASIN

WOOD & LEATHE

Paying attention to the design of rest rooms is very important due to the wide everyday use of it by the whole family. The bathroom is one of the most practical spaces in the house, the design and decoration of which should interact with other spaces in your home. A design that allows the most practicality with proper space management, while being beautiful and relaxing.

WASH BASIN

In fact, the bathroom furniture should be in harmony with the decoration of other spaces of the house. Different furniture can completely change the look and space and make it more practical. For this reason, considering the importance of of comfort in this space Manzouri Group has provided the possibility of design flexibility and customization of furniture in this space according to your taste.

WASH BASIN

WOOD & LEATHE

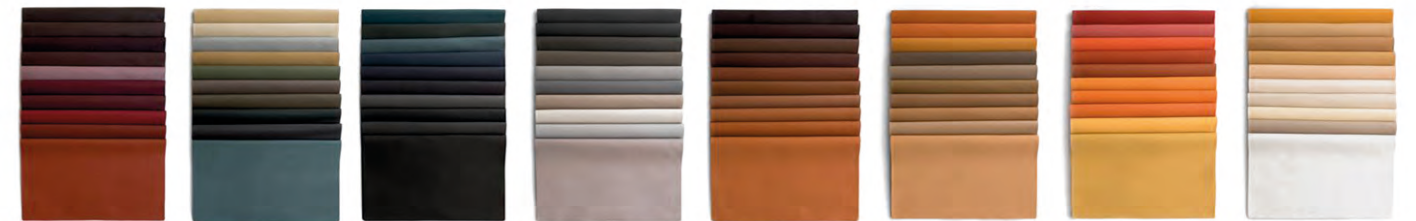

Due to the lack of different design in the bathroom furniture, Manzouri Group has started to produce furniture for this space. Beautiful and special appearance, proper space management with the least level of occupation and the use of different and special materials, are among the characteristics of the bathroom furniture produced by Manzouri Group. This furniture is a beautiful combination of different textures of African wood and the color and print of natural leathers. The toilets produced by Manzouri Group, with a special design and a combination of wood, leather and metal polish in construction, are completely different from the products available in the market, and can be customized according to your desired design and color.

NATURAL LEATHER

Natural leather is a valuable and durable material made from the hides of animals, primarily cows, sheep, and goats. It has been used for centuries in the production of clothing, shoes, bags, furniture, and decorative items. One of its key features is its high durability, as it resists wear and tear over time, often becoming more beautiful with age.

The tanning process transforms raw hides into stable and usable leather, making it resistant to decay and water penetration. Natural leather is also breathable, flexible, and comfortable, making it ideal for fashion and accessories due to its luxurious and timeless appearance.

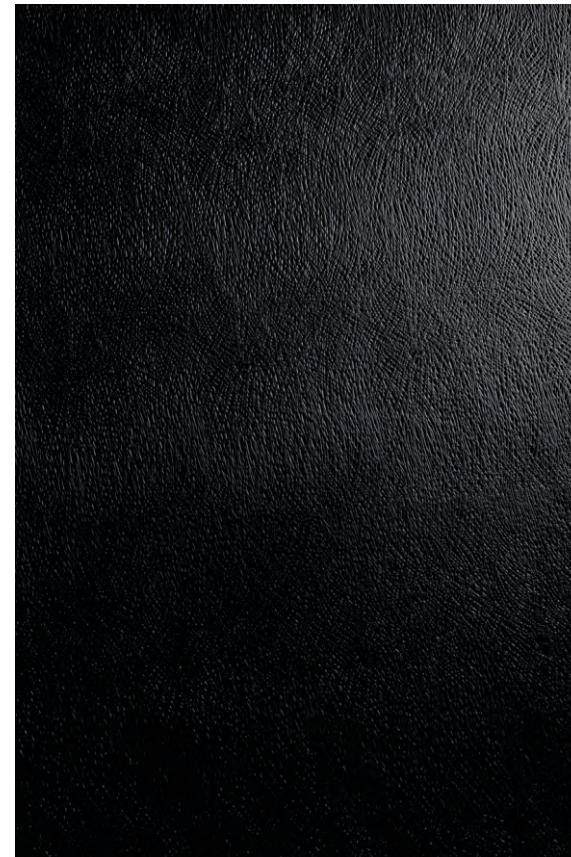

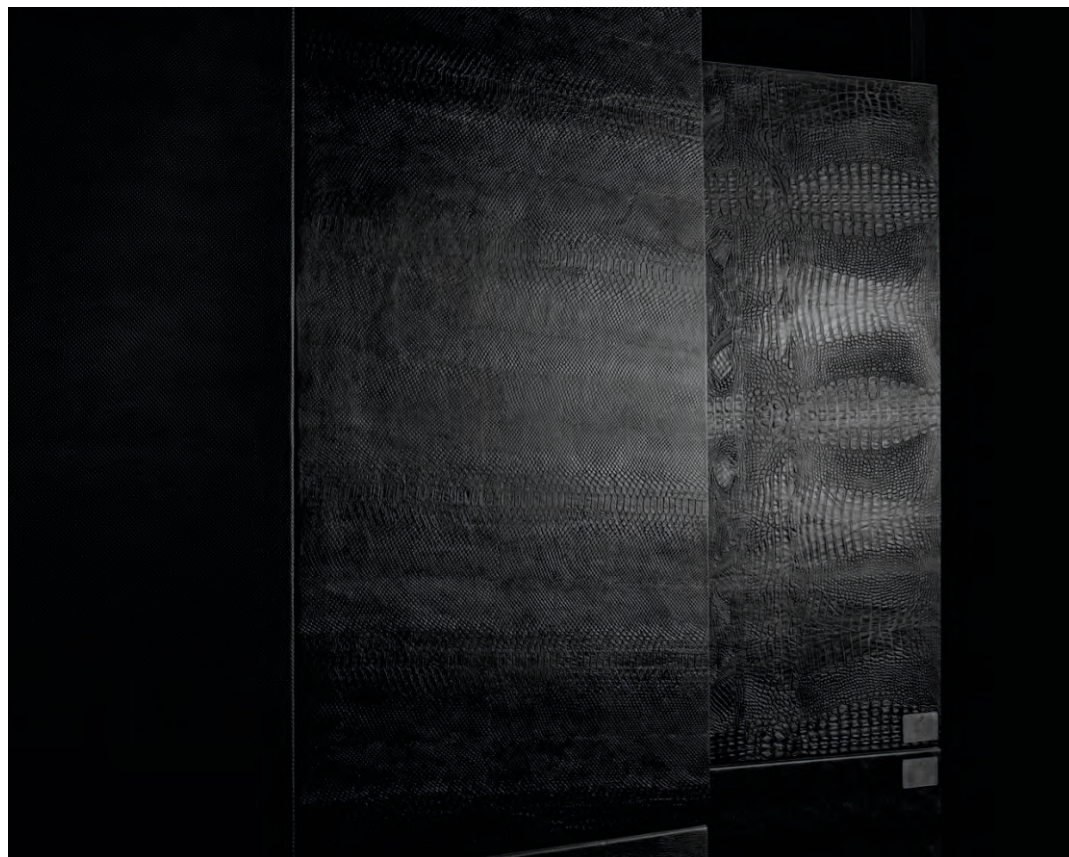

NATURAL LEATHER

In a world where quality and authenticity matter, genuine leather is the perfect choice for all your products. Each piece of natural leather, with its unique durability and beauty, brings a sense of authenticity and grandeur. From bags and shoes

to furniture and accessories, genuine leather not only offers an unparalleled look but also provides a soft and comfortable touch. By choosing natural leather, you respect the environment and gift yourself with quality and luxury.

PATTERN NATURAL LEATHER

OUTDOOR FABRIC

Outdoor fabrics are specially designed materials made for use in outdoor environments, such as furniture, awnings, umbrellas, and camping gear. These fabrics are built to withstand harsh weather conditions like sun, rain, wind, and humidity. Key features include water resistance, UV protection to prevent fading, mold and mildew resistance, and high durability against wear and tear. These qualities ensure that outdoor fabrics remain functional and visually appealing over time, making them ideal for prolonged outdoor use.

COLOR

Considering the above characteristics and quality assurance of furniture fabrics and the furniture produced by this group, fabrics, Manzoori group has imported the fabrics used by the best brands of outdoor furniture at two price levels to better meet the demands of its customers. One of these brands applied by Manzoori group is Sunbrella special collection in the field of furniture fabrics for outdoor space. which produces a unique collection of different fabric designs at the best level of world quality.

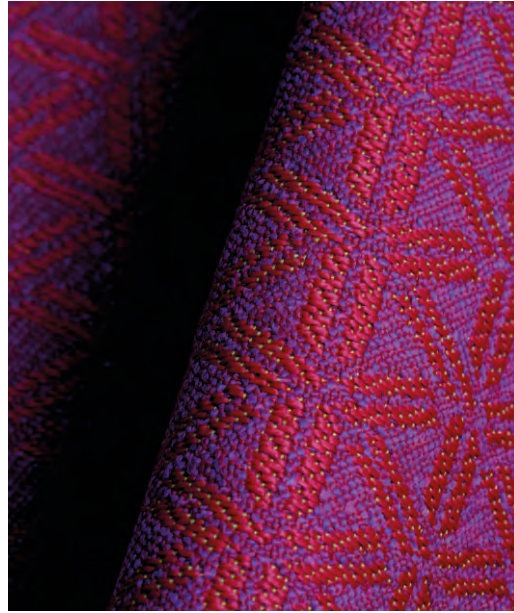

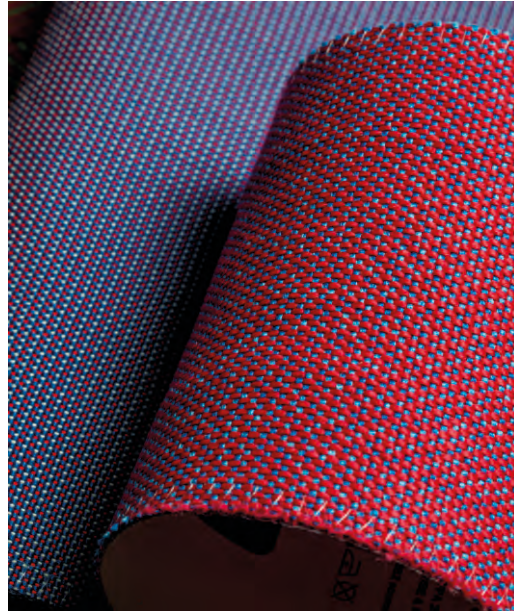

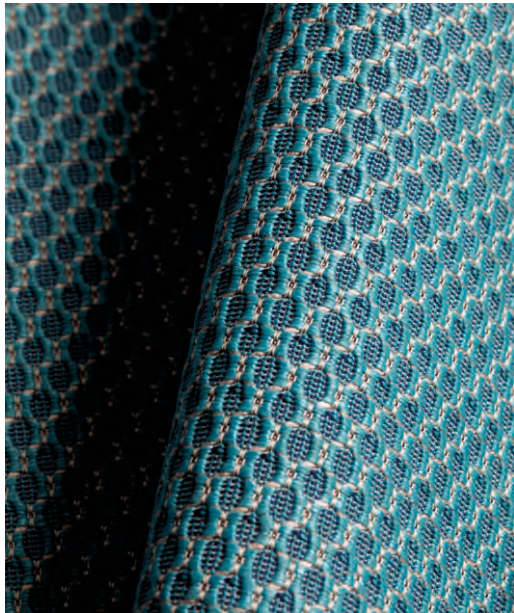

BEAUTY AND DURABILITY FOR ANY SEASON, IN ANY WEATHER.

Outdoor fabric is specially designed to withstand the elements, making it ideal for use in various outdoor applications such as furniture, awnings, and umbrellas. It is typically made from materials like acrylic, polyester, or olefin, which are known for their durability, water resistance, and resistance to fading from UV exposure. These fabrics are also treated to resist mold and mildew, ensuring they maintain their appearance and integrity over time. With a wide range of colors, patterns, and textures available, outdoor fabric not only offers practical benefits but also enhances the aesthetic appeal of outdoor spaces, providing a comfortable and stylish environment that can endure different weather conditions.

TROLLEY

Wooden outdoor trolleys, such as those used for barbecues and bars, offer a blend of functionality and natural beauty. These trolleys are made from high-quality, weather-resistant wood, ensuring durability in various conditions. Wooden trolleys add a decorative and attractive touch to outdoor spaces and their practical designs allow for easy transportation of supplies and equipment. They are ideal for hosting parties, picnics, and gatherings, providing a convenient space for serving food and drinks.

A NEW WAY OF LIVING

Mobile outdoor kitchens are popular for their versatility and convenience. Typically equipped with essential appliances like grills and portable refrigerators, these kitchens can be easily moved to different locations. Made from weather-resistant materials, they offer durability against the elements. With a mobile kitchen, you can enjoy the experience of cooking outdoors while having all the necessary tools readily available.

Onix

IceBoy

CREATING TOGETHERNESS

The outdoor kitchens by manzoori are so much more than a tool.
They are a symbol of conviviality and bring people together.

GAME TABLE

Wooden outdoor game tables are an excellent choice for open spaces due to their durability and natural beauty. Made from weather-resistant wood, they are suitable for gardens, yards, and parks. These tables are not only functional but also add charm and warmth to outdoor areas, creating a pleasant environment for entertainment and leisure. They can accommodate various games, including ping pong, chess, foosball, and other tabletop games.
